# ABOUT US

01

## Human Services

Experience in this field ensures our team can effectively provide all levels of services

02

## Integrated Care

Internal and External Team Process (Individual, support network, professionals)

03

## Outcomes

Our team is not just outcome focused but sustainability is part of our planning and service

### Individual Technology Solutions

Discover LumiCare's personalized technology services. Our LumiCare Assessment tailors technology, support, and training to individual needs. Collaborating closely with clients and their support networks, we establish customized plans for long-term success. Our commitment to ongoing customization ensures that technology evolves with our clients, remaining relevant and impactful throughout life's transitions.

### Consultation Services

We offer comprehensive consultation services to guide agencies in implementing technology solutions. From organizational assessments to strategic implementation planning and sustainability collaboration, we lay a strong foundation for seamless technology integration across your agency.

### Registered Nursing Services

LumiLink Nurse Connect is a remote nursing solution designed for providers. It offers 24/7 Registered Nursing Consultation to individuals and their caregivers. This comprehensive support system ensures that care is readily accessible with just a simple phone call.

### Technology Services and Support

LumiCare's expert team has experience in Human Services as well as multiple technology solutions. Our team will partner with organizations to integrate this solution with your team. Virtual telehealth consultations can be made available. In addition, critical health concerns can be monitored by Bluetooth devices. This is all provided through LumiCare's HIPAA compliant application and dashboard services that is also monitored 24/7 by team members.

### Training and Refinement

LumiCare recognizes that buy-in and team building are important to the success of any service. LumiCare's team strives to partner for trainings and refinement meetings so that our customers are receiving the services and support in the way that they need to enhance the care their organization provides.

## Provider Benefits

### Cost Savings

LumiCare's model is meticulously crafted to provide cost-effective quality care that remains readily available. Our dedicated team collaborates with your organization, ensuring seamless integration and optimization of resources.

### Improved Clinical Outcomes

Registered nursing consultation, when combined with technology services overseen by subject matter experts, leads to drastically improved outcomes. These improvements in quality of care encompass early diagnosis, reductions in emergency department visits, and effective incident resolutions. Our programs are designed to enhance patient well-being.

### Peace of Mind

LumiLink is here to provide consistent oversight for those that need it the most. Our closed loop system provides expert documentation and follow-up for any issues presented. This insight doesn't currently exist with strictly on the ground nursing models.

### Sustainability

In these times when providers are actively seeking solutions to improve their current services and prepare for the future, LumiLink steps in as a valuable partner. Our comprehensive care not only addresses immediate needs but also positions providers to be more competitive through our forward-thinking approach to healthcare and technology.
